December 13, 2012

Dear Sanibel City Hall,

Thank you for sharing your expertise at the 2012 Sanibel School's Seventh Grade Student Government Day. Your presentations about how our city functioned were excellent. For example, the zoning department, the public works department and the police force were interesting and provided us much insight into the interworking of Sanibel Island. We feel they will be exceedingly helpful to further understand our country's government because we can see how our local government compares to the state and national governments we learn about in class.

We appreciate your thoughtfulness in putting together the presentations and your thoroughness in delivering the information in a way that provided much information, but was not overwhelming or difficult to understand. We also appreciate your approachability and willingness to answer the questions we had after the presentations. We really enjoyed the mock council meeting. It was fun to pretend we were members of the council and express our views on local issues that we feel strongly about. Thank you for providing us with this great experience, and we hope that the tradition of Student Government Day will be carried on for many years to come.

Warm regards,

The Seventh Grade Class from the Sanibel School
