Location: 1 WILDLIFE DR

On Sunday, March 11, 2012 at approximately 1:10 PM I was dispatched to the Ding Darling NWR regarding damage to a city vehicle that was parked in the Ding Darling overflow parking lot.

I met with FWS Agent James Mathisen in the parking lot near the damaged vehicle. He stated that the damage was noticed by one of the Ding Darling tram operators (Don Parsons) and then reported to him. He then contacted Sanibel PD to report the the damaged vehicle.

The bus was parked facing south and the damage side was facing west. The damage was noticed by the tram operator as he made his loop to turn the tram around in the overflow parking lot. This is the normal loop the trams use in the lot.

The vehicle is a City of Sanibel vehicle and is used by the Recreation Dept as a transport bus/van 2004 Chevrolet bus FL City tag 228603. City vehicle #910.

The black tinted safety glass on the passenger access door on the right side of the vehicle was shattered and glass debris littered the ground outside on the asphalt pavement and inside on the floor of the vehicle.

The glass in this access door is much thinner than normal vehicle window glass. The glass is slightly thicker than the thickness of residential window glass. The window glass was factory tint rather than interior, after-market, film style tint.

There was nothing inside or outside the vehicle that appeared to have been used to break the glass, i.e. rock, hammer, pellet etc.

There was no other damage to the bus and nothing appeared to have been disturbed inside the bus. There was a

## Narrative

flare box, fire extinguisher, broom, recycle box, television facing passenger area and computer monitor (driver position) that were all intact inside the vehicle. There was no damage inside the vehicle

It is unknown if the window was kicked in, broken by hand, or if a object was used to break the glass and was then carried away.

Upon inspection of the of the window glass a one foot section of the glass remained attached at the top of the door . This portion of the glass was positioned in the frame and appeared to have been forced *outward*.

There was a small section of the window glass on the right edge of the frame in the lower section and this piece was positioned slightly *inward*.

The possibility remains that the broken glass was caused by heat expansion from inside the vehicle as the side of the vehicle with the broken glass was facing the sun at this hour of the of day. All other window glass was intact and the doors were locked.

**It is unknown when the damage actually took place. Sometime between Thursday and Sunday.**

---

Recreation Center employee and on-duty Rec Center Building Supervisor Tasha Maddix was called by Sanibel dispatch. She came to the scene at my request. She viewed the damage to the vehicle. She reported that the vehicle was last used this past Thursday March 8th.

Ms Maddix called Rec. Dept Director Andrea Miller and advised her of the incident. Mrs Miller wanted the Recreation Center employees to move the bus to the yard at Public Works. **The bus will not be in the Ding Darling lot overnight.**

I spoke with Andrea Miller by phone at 2:10 PM and explained what had taken place. She requested a copy of the report be emailed to her.

Five (5) photos of the damage and vehicle were taken and saved with this record.
