

City of Sanibel

MEMORANDUM

May 29, 2012

TO: Judie Zimomra, City Manager

FROM: Kimberly Greenplate, City Administrative Intern

RE: Analysis of the Reported Bicycle and Pedestrian Incidents 2006 – 2012

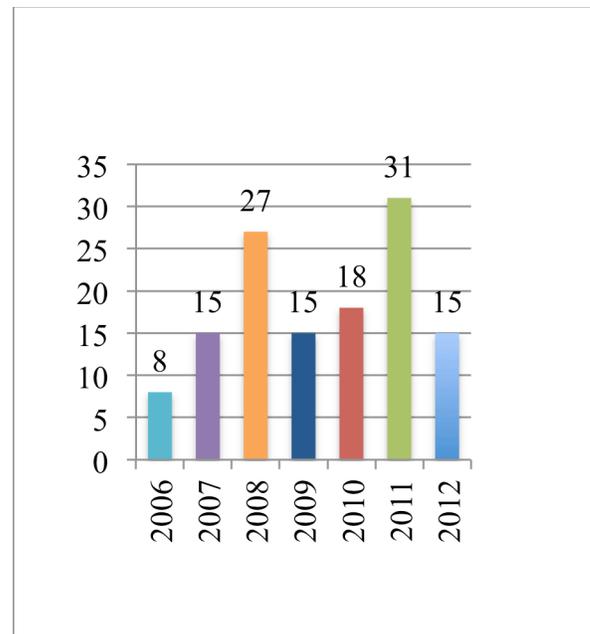

Background:

This report is an analysis of the safety issues on the Shared Use Path, as called for in the Shared Use Path Master Plan. This analysis is based upon the bicycle and pedestrian incidents reported to the Sanibel Police Department between 2006 and 2012. For the purpose of this analysis, the types of incidents have been divided into three types of locations: on the Shared Use Path, at crosswalks and in parking lots. These reports have been analyzed based on total incident volume, incident type, location type, date of incident, time of incident, the age, residency and injuries of involved parties.

Total Reported Incidents By Year:

Year	Number of Reported Incidents
2006	8
2007	14
2008	27
2009	15
2010	18
2011	31
2012	15

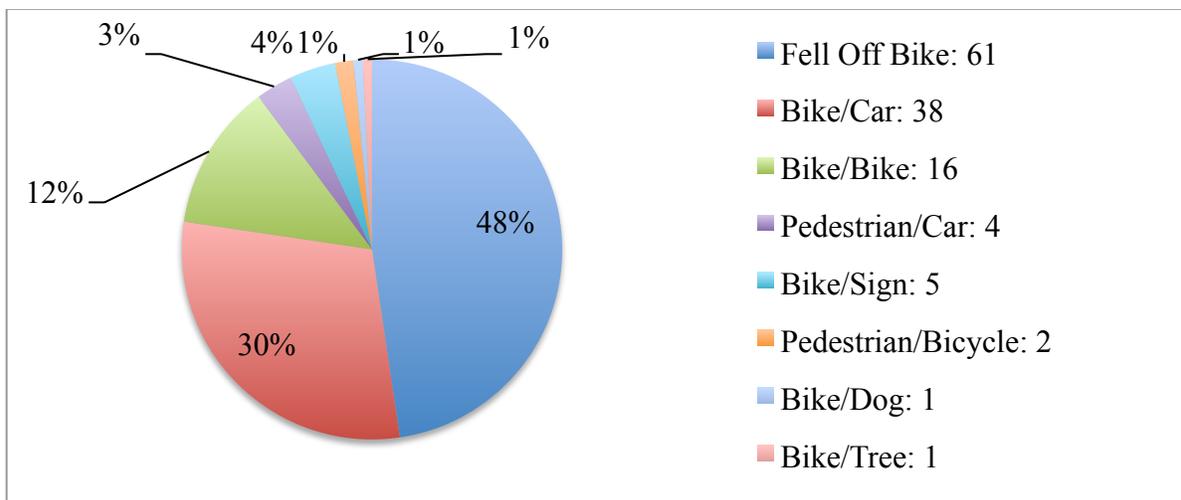

Total Reported Incidents 2006 – 2012:

Specific Reported Incident Type Totals By Year:

Incident Type: Year:	Fell Off Bike	Bike/Car	Bike/Bike	Ped./Car	Bike/Sign	Ped./Bike	Bike/Dog	Bike/Tree	Total Per Year
2006	5	2	1	0	0	0	0	0	8
2007	8	4	2	0	0	0	0	0	14
2008	19	6	1	1	0	0	0	0	27
2009	5	5	2	1	1	1	0	0	15
2010	5	5	3	1	2	1	0	1	18
2011	12	11	5	1	1	0	1	0	31
2012	7	5	2	0	1	0	0	0	15
Incident Total	61	38	16	4	5	2	1	1	128

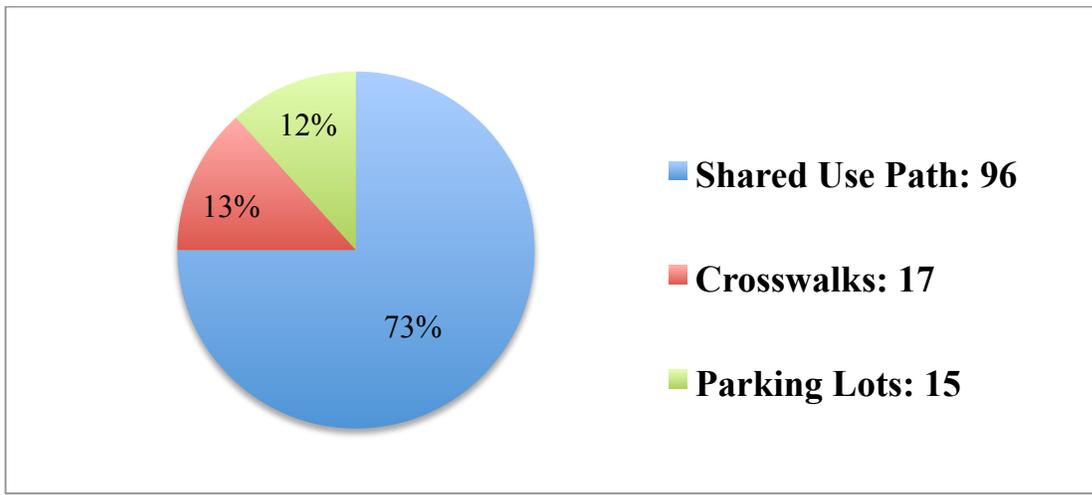

Specific Reported Incident Type Totals 2006 – 2012:

Locations of Reported Incidents by Year:

Where: Year:	Shared Use Path	Crosswalks	Parking Lots
2006	6	0	2
2007	9	2	3
2008	19	5	3
2009	10	3	2
2010	14	3	1
2011	23	4	4
2012	15	0	0
Total	96	17	15

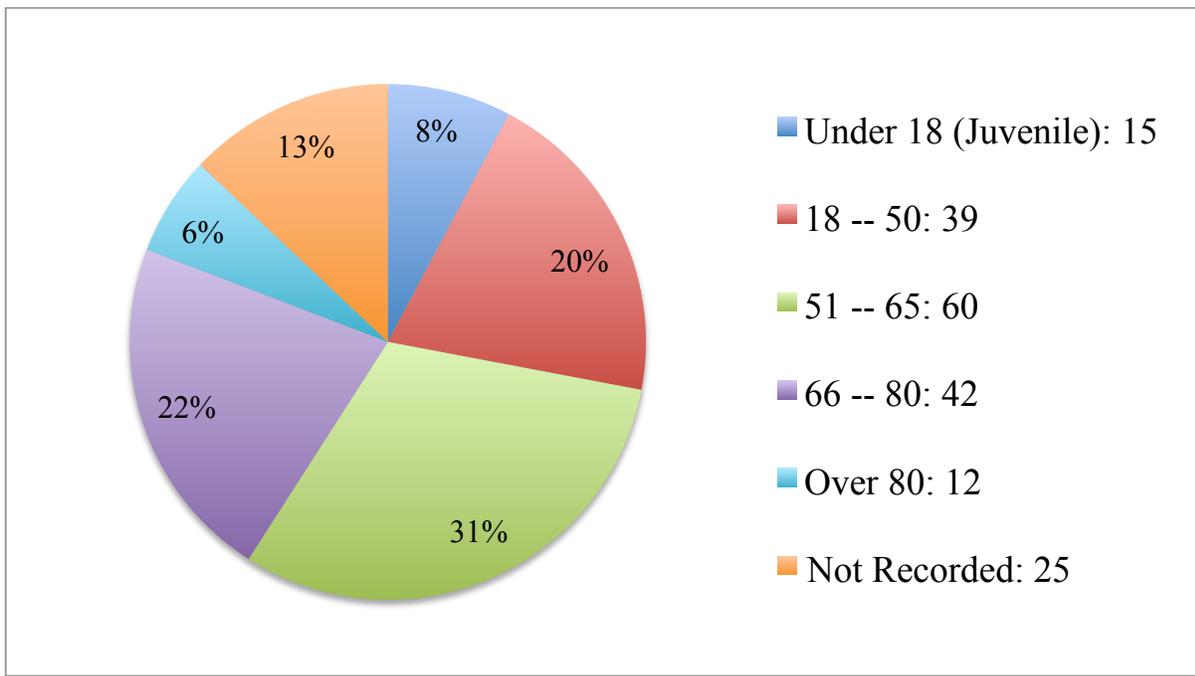

Locations of Reported Incidents 2006 – 2012:

Ages of Involved Parties in Total Reported Incidents by Year:

Age Range:	Under 18 (Juvenile)	18 – 50	51 – 65	66 – 80	Over 80	Not Recorded
Year:	Under 18 (Juvenile)	18 – 50	51 – 65	66 – 80	Over 80	Not Recorded
2006	0	6	1	0	0	4
2007	3	3	7	6	0	3
2008	3	9	11	6	1	5
2009	2	5	7	5	3	3
2010	3	6	11	4	3	3
2011	2	7	18	13	3	5
2012	2	3	5	8	2	2
Total	15	39	60	42	12	25

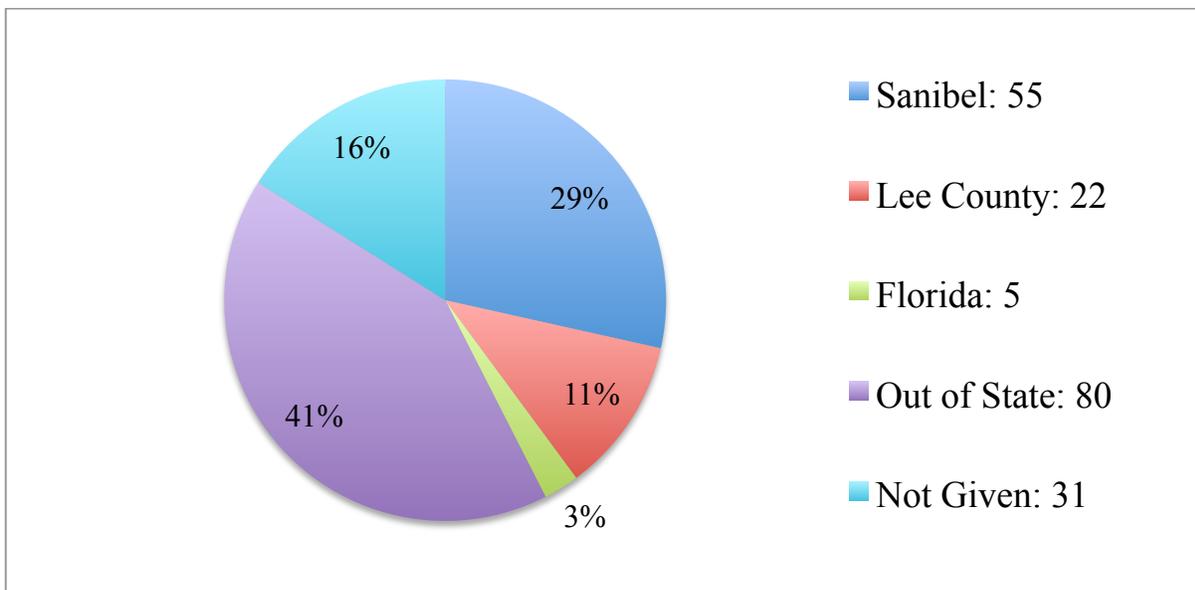

Ages of Involved Parties in Total Reported Incidents 2006 – 2012:

Residency of Involved Parties in Total Reported Incidents by Year:

Residency: Year:	Sanibel	Lee County	Florida	Out of State	Not Recorded
2006	3	2	1	0	5
2007	9	1	0	10	2
2008	10	3	2	15	5
2009	7	2	0	15	1
2010	7	3	0	11	9
2011	13	8	1	19	7
2012	6	3	1	10	2
Total	55	22	5	80	31

Residency of Involved Parties in Total Reported Incidents 2006 –2012:

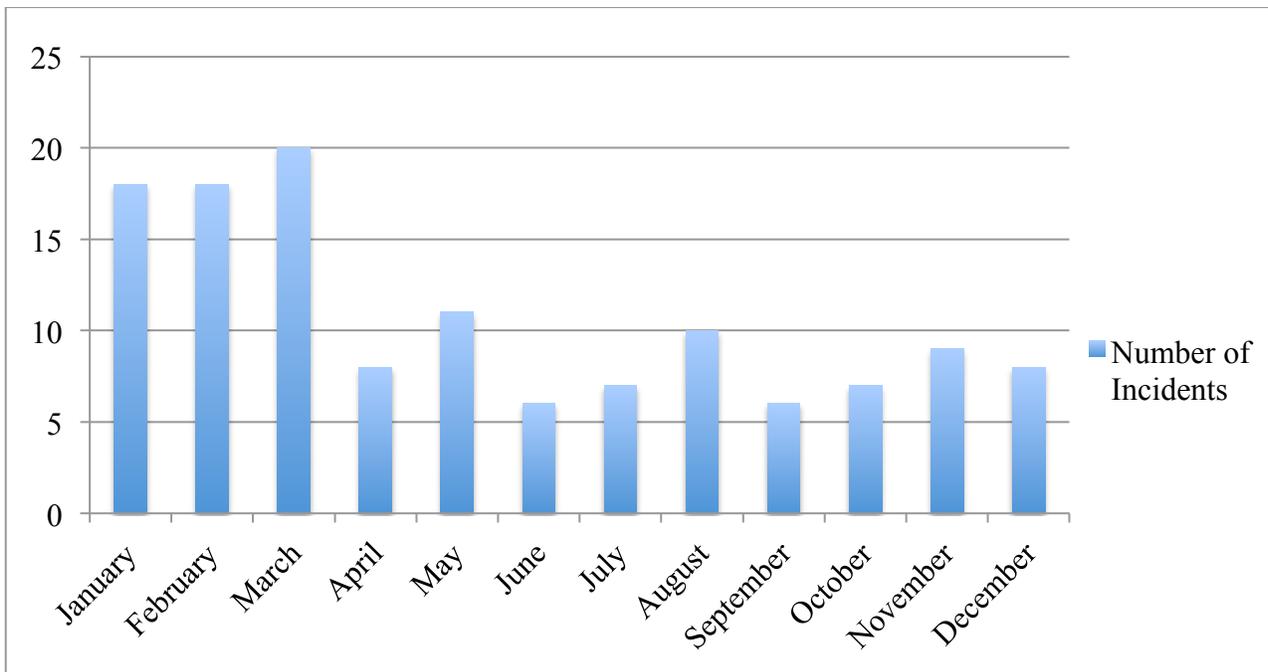

Injuries of Involved Parties in Total Reported Incidents by Year:

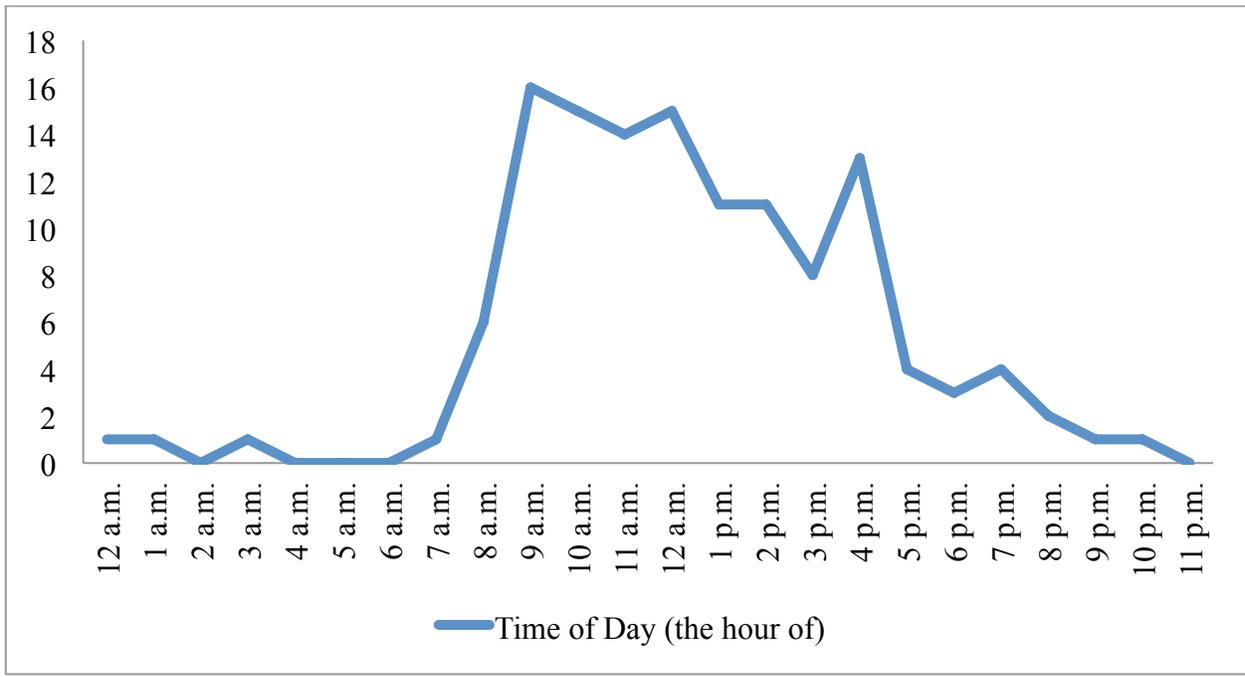

Injuries: Year:	Yes	No	Transported to Hospital (if Yes or Injuries Not Recorded)	Specific Injuries Not Recorded
2006	7	1	2	0
2007	9	1	3	4
2008	18	6	7	3
2009	10	3	6	2
2010	12	5	5	1
2011	20	7	12	4
2012	13	2	2	0
Total	89	25	37	14

Note: Not every reported incident listed whether the involved parties were transported to the hospital after the Sanibel Police Department left the scene.

Dates of Reported Incidents by Month 2006 – 2012:

Times of Reported Incidents by Hour 2006 – 2012:

Tickets Issued for Reported Incidents 2006 – 2012:

Year:	Number of Tickets Issued for Incidents:
2006	0
2007	1
2008	4
2009	3
2010	3
2011	4
2012	0
Total	15

Conclusions:

- The Shared Use Path Survey Results, completed in May 2012, recorded a **56.1% increase in the overall bicycle traffic and a 76.5% increase in the overall pedestrian traffic** between 2006 and 2012 (**Shared Use Path Survey Results Memorandum attached as Appendix A**). **Over the period of increased usage of the Shared Use Paths, 130 reported bicycle and pedestrian incidents occurred.**
- **73%** of incidents occurred between 2006 and 2012 on the **Shared Use Path**, as opposed to crosswalks (13%) and parking lots (12%)
- **The most common reported incident** over the six-year study period was “**fell off bike**” representing **48% (61 incidents)**
- **The highest incident-intensity area was along Periwinkle Way between Casa Ybel Road and Donax Street, where almost 20% of incidents occurred**
- **Out-of state-residents made up the single largest demographic (41%)** of those involved in reported incidents
- **The age range from 51 – 65 was most involved** in reported incidents and accounted for **31%** of the six-year total
- **89 out of 128 (70%) of reported incidents resulted in injuries, including minor injuries which required no medical attention**
- **37 out of 128 (29%) reported incidents had injuries where at least one party was transported to the hospital** from the scene of the incident
- Accumulative over the six-year period, **March (20 incidents)**, followed by January and February (18 incidents each), **was the most frequent month for reported incidents**
- **Most reported incidents (16)** occurred **between 9 and 10 a.m.** during the six-year period
- **A total of 130 incidents were reported** to the Sanibel Police Department from 2006 – 2012, and **128 were used in this analysis. Of the other two reported incidents: One did not occur on Sanibel (but Captiva) and was responded to via mutual aid agreement. The other involved a bicycle as the indirect cause of an incident (the bicycle was a distraction of motorists).**

The Next Steps:

- Continue to educate all Shared Use Path users and motorists on proper path usage and courtesy.
- Continue to enforce traffic laws to ensure the safety of residents and visitors on the Shared Use Path system and Sanibel at large.
- Continue to evaluate the reported incidents for vehicle, bicycle and pedestrian safety improvement.

RE: Shared Use Path Survey Results

Background

The City of Sanibel created the 2009 Shared Use Path Master Plan to continue to provide residents and visitors with a variety of human-powered transportation/recreation options. The Master Plan prioritizes the safety of the Shared Use Path and its users. In both 2006 and 2012, a survey was conducted to assess the bicycle and pedestrian traffic at notable intersections along the Shared Use Path. For consistency both surveys were conducted on a Thursday afternoon (12:30 p.m. to 4:30 p.m.) and a Saturday morning (8 a.m. to 12 p.m.) in late April. The times and dates of the surveys were selected to represent typical rather than peak or low volume. However, the 2006 survey contained a questionnaire for those utilizing the Shared Use Path to fill out. This questionnaire resulted in information such as conveyance origin, purpose of trip and permanent residence.

Below are the comparisons between the 2006 and the 2012 Shared Use Path Surveys, including percentage differences. Only the comparable categories are included. A margin of error must be taken into account, as the human eye was responsible for conducting the surveys. The 2012 Survey contained one additional intersection at Dunlop/Library. This intersection was added to reflect the 2010 Path extension. The addition of this path had marginal impact on total volume of path users. Also, small differences were noted on the 2006 Survey between the total number and addition of the numbers for individual intersections.

I. Bicycle Totals at Individual Intersections

Intersections:	San-Cap/ Rabbit Road	San-Cap/ Tarpon Bay	West Gulf/ Tarpon Bay	Periwinkle/ Casa Ybel	Middle Gulf/ Donax	Periwinkle/ East Gulf
2006 Survey	357	400	594	719	390	519
2012 Survey	616	509	886	806	754	935
Difference	+259	+109	+292	+87	+364	+416
Percentage Increase or Decrease	 72.5%	 27.25%	 49.2%	 12.1%	 93.3%	 80.2%

II. Bicycles Totals Overall

	Overall
2006 Survey	2,979
2012 Survey	4,650
Difference	+1,671
Percentage Increase or Decrease	 56.1%

III. Pedestrian Totals at Individual Intersections

Intersections:	San-Cap/ Rabbit Road	San-Cap/ Tarpon Bay	West Gulf/ Tarpon Bay	Periwinkle/ Casa Ybel	Middle Gulf/ Donax	Periwinkle/ East Gulf
2006 Survey	8	14	485	33	107	8
2012 Survey	28	10	818	115	175	195
Difference	+20	-4	+333	+82	+68	+187
Percentage Increase or Decrease	 250%	 28.6%	 68.7%	 248.5%	 63.6%	 2337.5%

Note: Pedestrians include both walkers and runners/joggers for both surveys.

IV. Pedestrian Totals Overall

	Overall
2006 Survey	771
2012 Survey	1,361
Difference	+590
Percentage Increase or Decrease	 76.5%

Note: Pedestrians include both walkers and runners/joggers for both surveys.

V. Bikes on Road

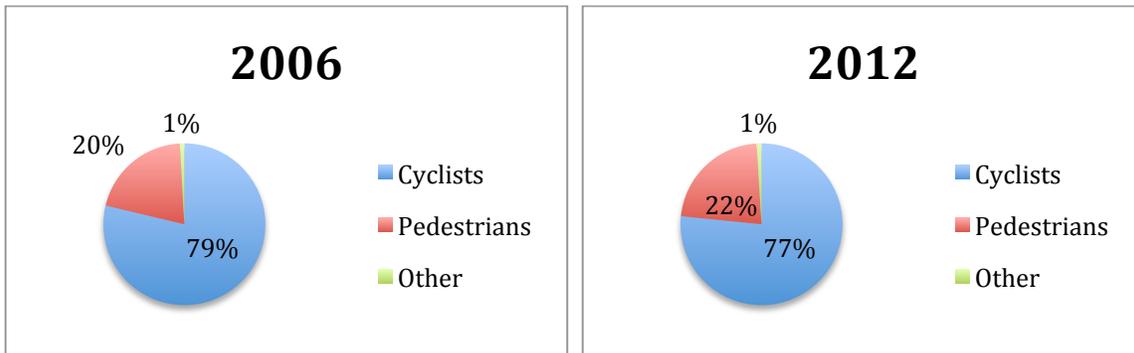

Intersections:	San-Cap/ Rabbit Road	San-Cap/ Tarpon Bay	West Gulf/ Tarpon Bay	Periwinkle/ Casa Ybel	Middle Gulf/ Donax	Periwinkle/ East Gulf
2006 Survey	9	6	13	0	18	22
2012 Survey	7	0	23	1	30	16
Difference	-2	-6	+10	+1	+12	-6
Percentage Increase or Decrease	↓ 22.2%	↓ 100%	↑ 76.9%	--- Flat	↑ 66.6%	↓ 27.27%

VI. Bicycles Helmet Use Overall Totals

Note: Florida statute 316.2065: Bicycle Regulations (D) states that a bicycle rider or passenger who is under 16 years of age must wear a bicycle helmet that is properly fitted and is fastened securely upon the passenger's head. Above charts are for all riders, including those above 16 years of age.

VII. Overall Shared Use Path Users

Note: Other includes skaters and surreys.

VIII. Bicycle Rental Totals

	Overall
2006 Survey	1,215
2012 Survey	1,811
Difference	+596
Percentage Increase or Decrease	 49.1%

Note: Rentals include bicycles with attached signs of rental facility name, clearly marking it as a rental. The category does not include bicycles rented without a sign or borrowed from another.

Conclusions

- **Bicycle usage at each of the six intersections increased** between 2006 and 2012
- **Pedestrian usage of the Shared Use Path also increased overall** between 2006 and 2012

- **Over 4,500 bicyclists utilized the Shared Use Path in 2012** within the surveys' sample time of four hours on a Thursday afternoon and four hours on a Saturday morning
- **Over 50 percent increase in the overall bicycle traffic** between 2006 and 2012 within the surveys' sample time of four hours on a Thursday afternoon and four hours on a Saturday morning
- **Greatest bicyclist increases** at the intersections of San-Cap/Rabbit Road, West Gulf/Tarpon Bay, Middle Gulf/Donax and Periwinkle/East Gulf
- **All intersections had a more than 80-bicyclist increase** between 2006 and 2012 within the surveys' sample time of four hours on a Thursday afternoon and four hours on a Saturday morning
- **Largest percentage of bicycle increase** from 2006 to 2012 was at the intersection of **Middle Gulf/Donax**, with an **over 93 percent change**
- **Periwinkle/East Gulf** in 2012 saw the **greatest increase in bicyclists**, counting **416 more** than in 2006
- **Overall percentage of increase for pedestrians was much greater at each intersection than the overall percentage of increase for bicyclists**
- **San-Cap/Rabbit, Periwinkle/Casas Ybel and Periwinkle/East Gulf had pedestrian percentage increases of over 100 percent**
- **600 more pedestrians** between the 2006 survey and the 2012 survey within the surveys' sample time of four hours on a Thursday afternoon and four hours on a Saturday morning. This shows that engaging in recreation on Sanibel is **increasing beyond bicycle or conveyance use**, including self-owned and rentals.
- **Pedestrian percentage of increase was over 75 percent** between 2006 and 2012. This shows that more residents and visitors on Sanibel are using the Shared Use Path, regardless of purpose or destination of trip.
- **Pedestrian use of the Shared Use Path increased to 22 percent of all users in 2012 from 20 percent of all users in 2006.** Cyclists decreased to 77 percent in 2012 from 79 percent in 2006 in terms of overall use.
- **Skaters and surrey users remained at 1 percent of all Shared Use Path users for both 2006 and 2012**
- **Bicycles using the road increased** in 2012 at the intersections of West Gulf/Tarpon Bay, Periwinkle/Casa Ybel and Middle Gulf/Donax

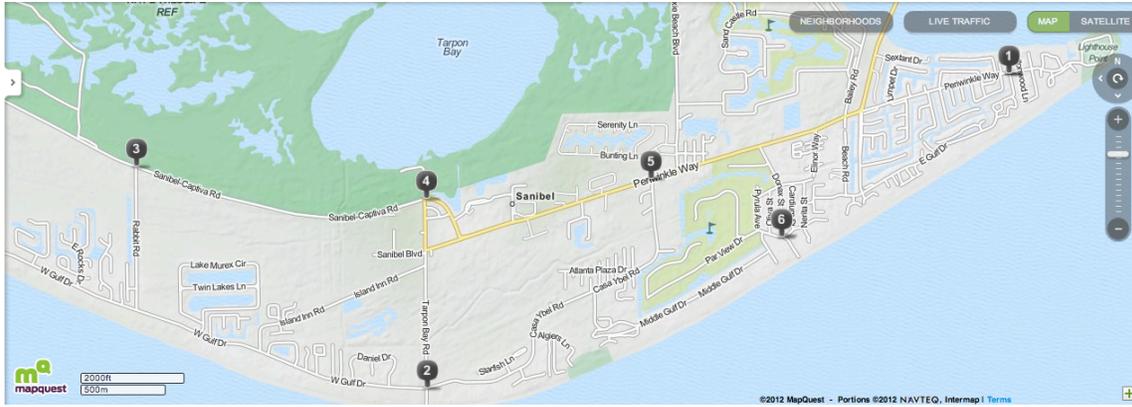

- Intersections of San-Cap/Rabbit Road, San-Cap/Tarpon Bay and Periwinkle/East Gulf saw a **decrease in bicycles using the road**
- **Percentage of helmet use between 2006 and 2012 remained flat. Helmet usage was 37 percent in 2006 and 38 percent in 2012.** About 2/3 of bicyclists are using helmets and 1/3 are not. Bicycle riders or passengers over age 16 are not required by law to wear a helmet. However, age was not part of the surveys.
- **Rental totals increased nearly 50 percent** and by almost 600 people between 2006 and 2012. Rental bicycles only include those with plaques from the rental facility, clearly marking the ownership. It is unknown if any of the other bicycles counted in the overall totals were unmarked or rented from resorts. Thus, results about rental bikes from the surveys pertain to only those rented from certain facilities on Sanibel that use plaques for identification, and the results cannot be considered accurate for all bike rentals on Sanibel.
- **Approximately 62 percent of bikes or conveyances were identified as self-owned in the 2006 survey questionnaire**, while the remaining percent were rented or provided by a rental property. Rental bikes totaled 1,811 in the 2012 survey, but it was not indicated if this was included in the overall bicycle total or a separate count.

The Next Steps

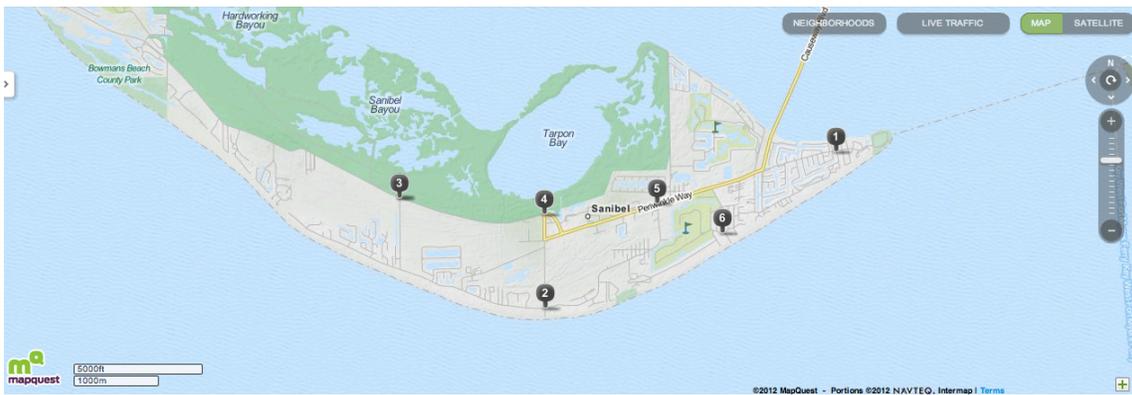

- The effects of the increased utilization of the Shared Use Path system should continue to be monitored.
- Accident history and future collisions/incidents should continue to be monitored and analyzed. If the City pursues additional safety education on helmet usage, an interceptor study on the reasons why cyclists are not using helmets may be helpful.
- The design of a helmet education program should also be considered after the results from an interceptor survey that discovers reasons for helmet use/lack of helmet use is conducted.
