Judith A. Zimomra, City Manager
City of Sanibel
800 Dunlop Road
Sanibel, FL 33957

Ms. Zimomra,

The Lee Memorial Health System Foundation is pleased to announce that the Golisano Children's Hospital of Southwest Florida has been awarded a grant of \$16,060 for Sanibel Swims, a program to be implemented jointly with the City of Sanibel Recreation Department. Details of the program objectives and activities are attached in the grant proposal. The LMHS Foundation agrees to reimburse the City of Sanibel Recreation Department for the expenses as outlined in the grant proposal.

We would like this letter to serve as a contract agreement between the City of Sanibel and the LMHS Foundation for the purposes of this grant program. As a process for payment and reporting, the City of Sanibel Recreation Department would agree to submit monthly reimbursement requests along with program reporting elements to monitor progress of the program (for that month, the number of children served, classes and participants, items purchased, staff trained) per the grant proposal.

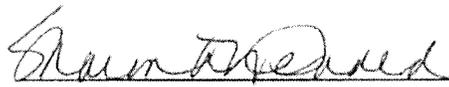

If there are any questions, please do not hesitate to contact me at (239) 343-6950. Thank you for your time and commitment to drowning prevention and the health of children in our community.

THE CHILDREN'S HOSPITAL OF SOUTHWEST FLORIDA
SANIBEL SWIMS PROGRAM PROPOSAL, 2012

Miles of sandy white beaches and tropical weather define the paradise of Sanibel Island. Thousands of children enjoy the outdoor wonderland every year here in our backyard. The blue green waters of Gulf of Mexico or the cool clear swimming pool are inviting to residents and visitors but they also represent the leading cause of death for children under 5 – drowning. A preventable accident, drowning can happen in an instant – the time it takes to answer a quick phone call or move a load of laundry, a child can drown.

The Children's Hospital of Southwest Florida (TCH) and the City of Sanibel Recreation Center (Rec Center) are proposing a new program "Sanibel Swims". The program will target preschool and school-aged children with swim lessons, water safety education, and life-saving techniques. The Sanibel Recreation Center is uniquely qualified to provide swim instruction to a captive audience of children. The Rec Center, with 8 certified swim instructors, currently has over 90 children in the afterschool program. Most of those children are residents of the island and come from the Sanibel School. During the 10-week summer camp, the Rec Center has over 85 children each week from kindergarten through 8th grade – some of whom are non-residents but whose parents work on the island. Through this program, TCH and the Rec Center are seeking to provide swim lessons to 85 afterschool children and 100 summer camp children. In addition to the lessons, children will receive booklets on water safety and a program t-shirt. Also, for children who forget their swim suits, goggles and/or towels on swim days, the Rec Center will have them available on site. TCH will provide outreach and education to the day care center providers on the island and will provide vouchers for day care children to obtain swim lessons at the Rec Center.

To provide all of these swim instruction opportunities, it will be necessary to have more Rec Center staff trained as Water Safety Instructors (WSI). Part of these funds will be used for that purpose. Lee County overall has a very low number of WSI trained people. So, not only will the Sanibel Recreation Center be a valuable asset of the Sanibel community, but a resource for rest of the county to train more Water Safety Instructors.

Another key component of drowning prevention is basic lifesaving skill instruction. TCH and the Rec Center will use part of these funds to provide CPR (compression-only) training once of month. CPR saves lives and the more people who learn just the compression-only skills, the more deaths can be avoided.

The success of Sanibel Swims will depend on getting to message out to the community. The Rec Center already works closely with the Sanibel School and TCH will reach out to the day care centers on the island to reach parents, but there will also be outreach through the local newspapers and places where residents of the island frequent to reach people like grandparents who may not be aware of the drowning prevention message and services available. To assist in the outreach and education, the program will use some of the funds for print materials and supplies.

TCH is proposing an initial budget of \$16,060 to implement Sanibel Swims during the 2012-2013 school year and 2013 summer to an estimated 215 children. After the initial implementation, it can be determined if the size of the program is optimal or if more children can be served with more funding.

**THE CHILDREN'S HOSPITAL OF SOUTHWEST FLORIDA
SANIBEL SWIMS PROGRAM PROPOSAL, 2012**

Sanibel Swims Proposed Budget

	Cost/Unit*	Units	Cost
One Week of Swim Lessons for Afterschool Program Participants	\$20.00	85	\$1,700
