Sec. 14-212. Value of Project or Work.

(a) The value of the project or work will be determined as follows:

- (1) For single-family and duplex projects, new construction and additions, value will be based upon an assigned cost of \$275.00 per square foot of gross living area and an assigned cost of \$138.00 per square foot of gross nonliving area.
- (2) For commercial and all other projects, value will be based upon the greatest of the following:
 - a. The actual cost of the project;
 - b. The reasonable estimated cost to replace the building, structure or other system in kind; or
 - c. The average cost of similar projects in the city within the previous six months.

- (b) The valuation submitted must include the total cost of the project or work.
- (c) If the project or work appears to be underestimated on the application, the building official shall deny the application and shall not issue the permit.
- (d) The Building Official can, after review of a project, value the cost of a project at a rate higher than \$275.00 per square foot of gross living area, the \$138.00 valuation per square foot of non-living area, or both, if it is determined that the construction of the project is unique and more costly than the valuations indicated above.

- (e) An applicant can appeal the \$275.00 valuation per square foot of gross living area, the \$138.00 valuation per square foot of non-living area, or both, if they can show documentation in the form of a signed contract that indicates that the cost of the improvement is less than the applied valuation.
